RETAIL DESIGN PROJECTS
IN MARYLAND

Brian Swanson is the President and Creative Director of Swanson Design and an award-winning designer, with over 40 years of retail design experience.

Swanson Design LLC creates refined retail and hospitality environments that elevate brand identity, customer experience and long-term value through detail driven design.

Brian brings in-depth understanding and creativity to the Baltimore and Maryland retail market.

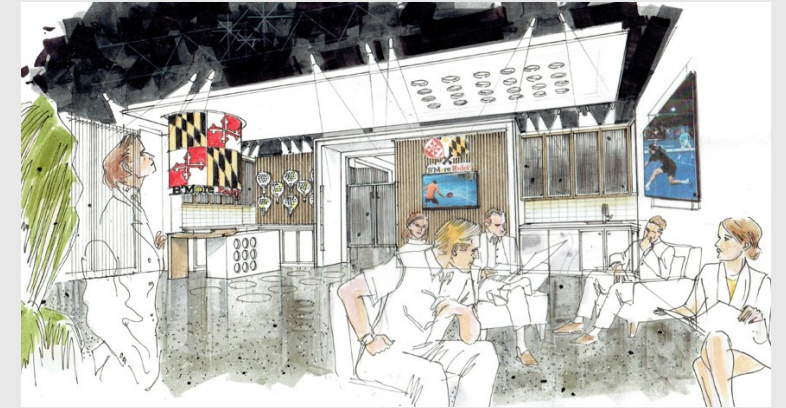

Proposed Improvements

Carney Village Shopping Center - Carney MD

Repositioning of this Baltimore County shopping center for Continental Realty. Concepts includes focal towers and upgraded storefronts for prime tenants to attract new tenants based on a changing demographic.

Existing Shopping Center

B'More Padel Wellness Spa Facility

This new facility, adjacent to four Padel courts, includes a reception area, relaxation lounge, locker room, showers, sauna, and cold plunge baths for Padel tennis players.

Swanson Design's concept for the B'More Padel Wellness Facility design includes calming aesthetics that include wood finishes, graphics and carefully designed lighting to provide ambience and relaxation.

Post-session lounging areas enhance the experience and community of Padel players.

View at Ellsworth - Fenton Street Entry

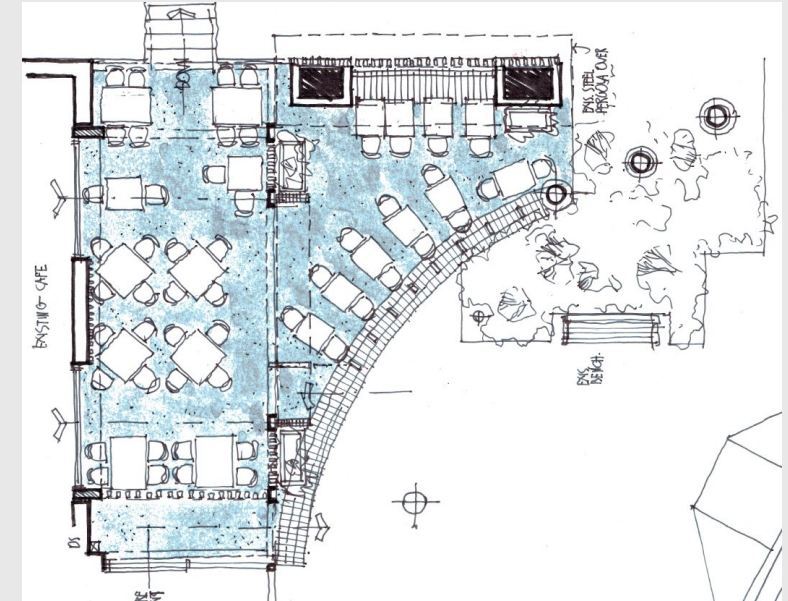

Elsworth Place - Colesville Road Entry

Elsworth Place, Silver Spring MD

Swanson Design worked with CI Design Baltimore as their design consultant. CI implemented the project and Swanson Design developed concepts and reviewed their DD package.

The design intent, proposed by the client, was to enhance the base building architecture with a Vintage-Industrial-Eclectic overlay consisting of machined and hand-made objects, artifacts, elements, components, etc., of a by-gone era that will build the value of the customers' shopping experience.

In effect, the design overlay approach is a visual merchandising of the public spaces.

Stone Mill Bakery and Café At Greenspring Station MD

Stone Mill Bakery & Café at Greenspring Station is a long-running, family-owned artisan bakery and casual café in the Falls Road retail complex in Baltimore County.

Swanson Design developed a concept to activate the entry by expanding open air seating into and adjacent area, contained with a trellis enclosure.

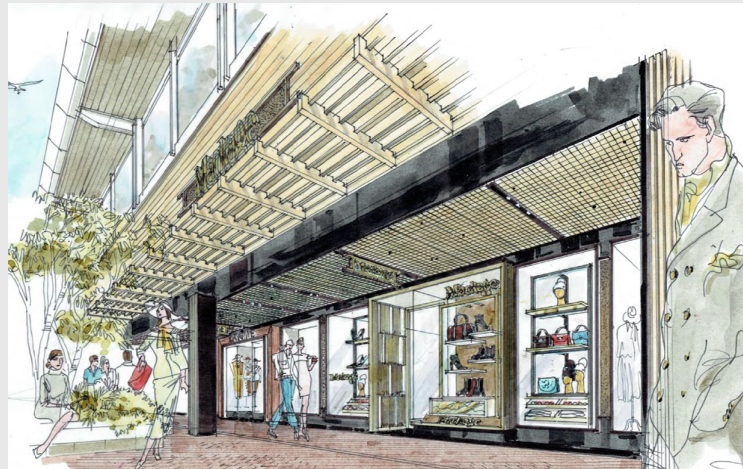

After Renovation

Before

Rendering of Storefront Improvements

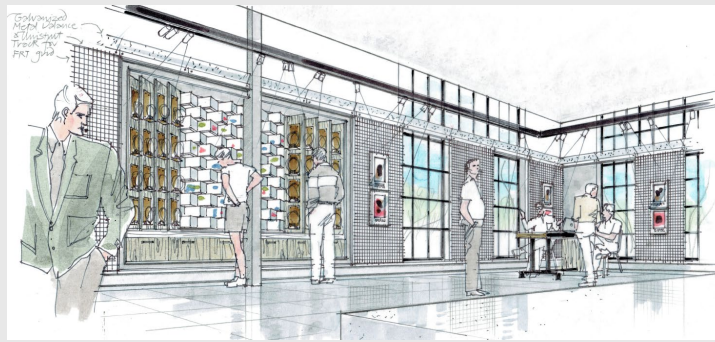

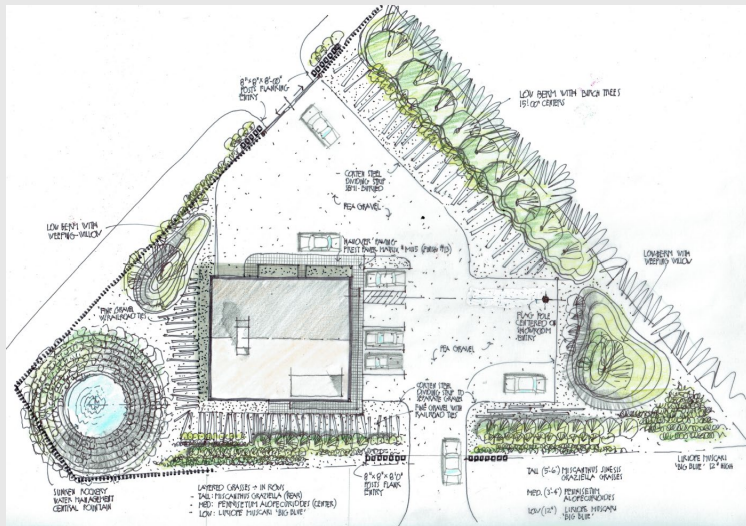

Rendering of Storefront Improvements

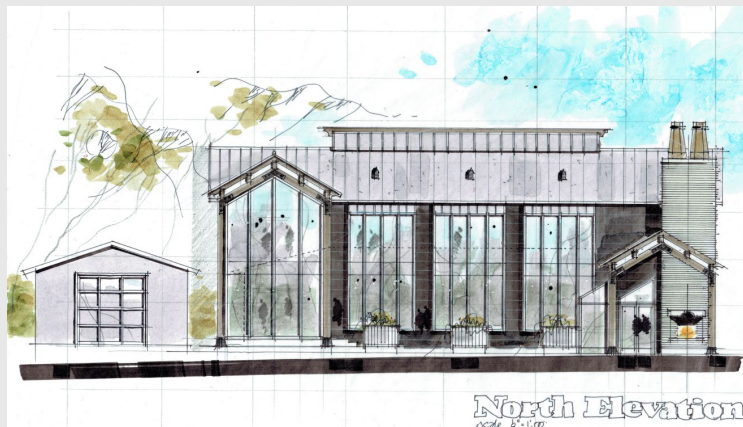

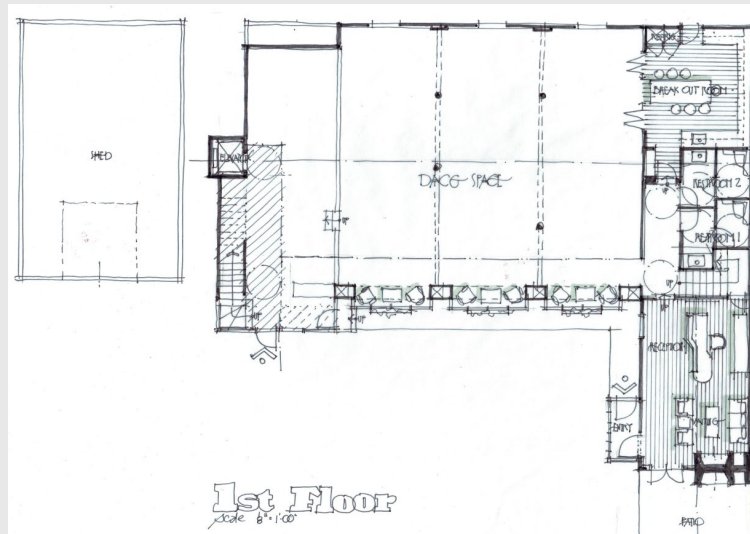

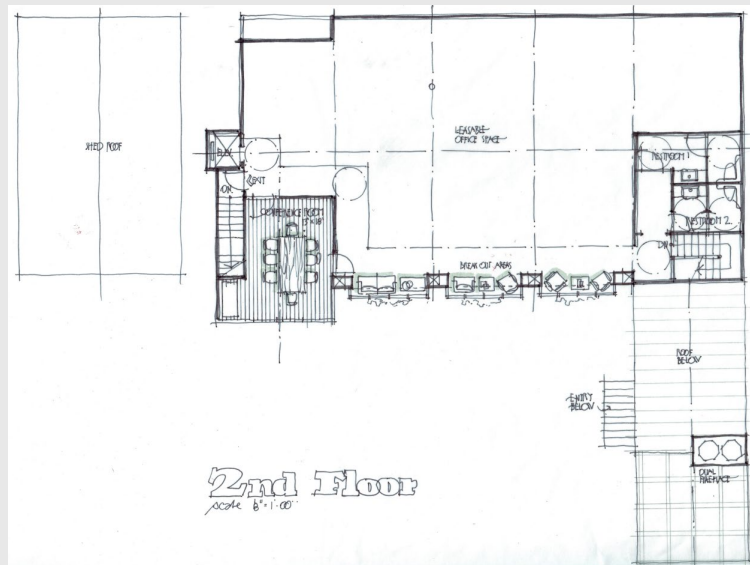

The Village of Cross Keys

The storefront design upgrades at the Village of Cross Keys uses new wood elements as a key device to “warm up” and contemporize the 1960s modernist retail blocks, particularly along the pedestrian walks and at primary tenant frontages. The wood is a unifying layer—cladding, soffits, screens, and accents—over the original concrete-and-brick framework, so the center feels more like a garden courtyard and less like a hard-edged office plaza.

Along the internal pedestrian streets, the renovation introduces continuous bands and panels of wood at soffits, canopies, and selected columns to create a warmer, more intimate walking scale. so that tenants front directly onto a sequence of shaded, garden-like passages rather than exposed concrete corridors. The palette of wood, stone, and metal is intentionally “handcrafted” in feel, with wood screens and cladding softening large expanses of glazing and masonry.

OFFICE BUILDING FOR DACG (initial option)

Delbert Adams Construction Group (DACG) has set the standard for high-end residential remodeling and new home building. Swanson Design was asked to develop design options for a new office building for DACG at 1415 Clarkview Road in Baltimore.

Sunnyfields Showroom

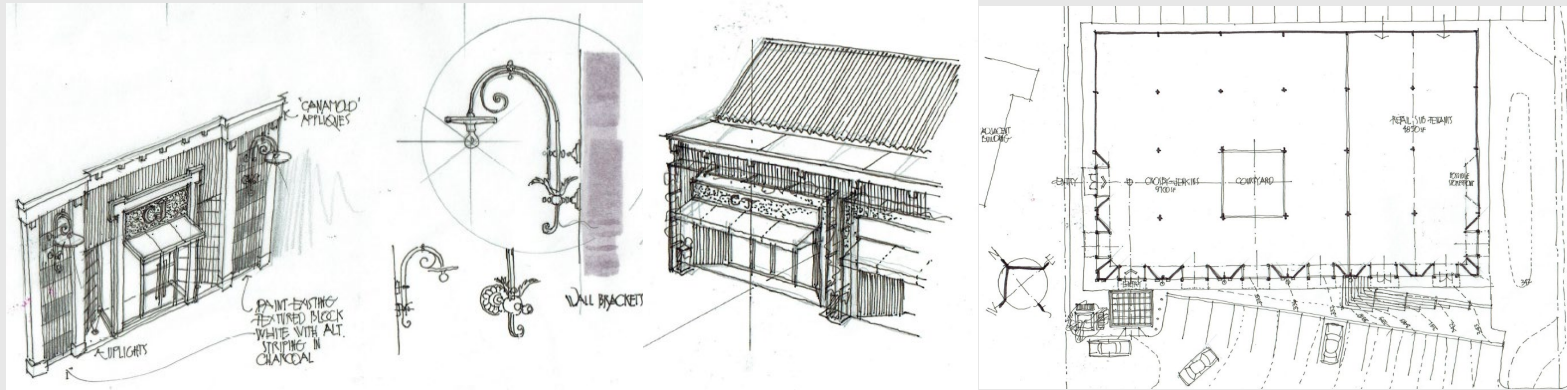

This is an existing building that was converted into a kitchen showroom. It recently won the National Showroom of the Year from the National Kitchen and Bath Association.

The brief was to create a contemporary barn using rustic, faux steel beams and a backdrop of exposed wood studwork. Concealed lighting reflects off the glass, giving the interior a quiet elegance and highlights the juxtaposition of the old with the new.

The simple grid store front has a portal frame supporting the Sunnyfields' logo and gable ends bookend the cottage-style architecture of the building.

Proposed Concept

Existing Commercial Building

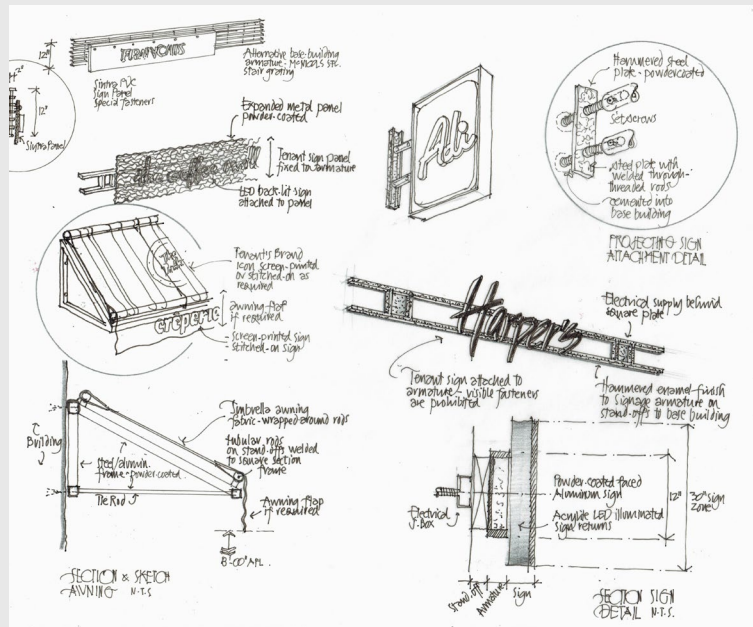

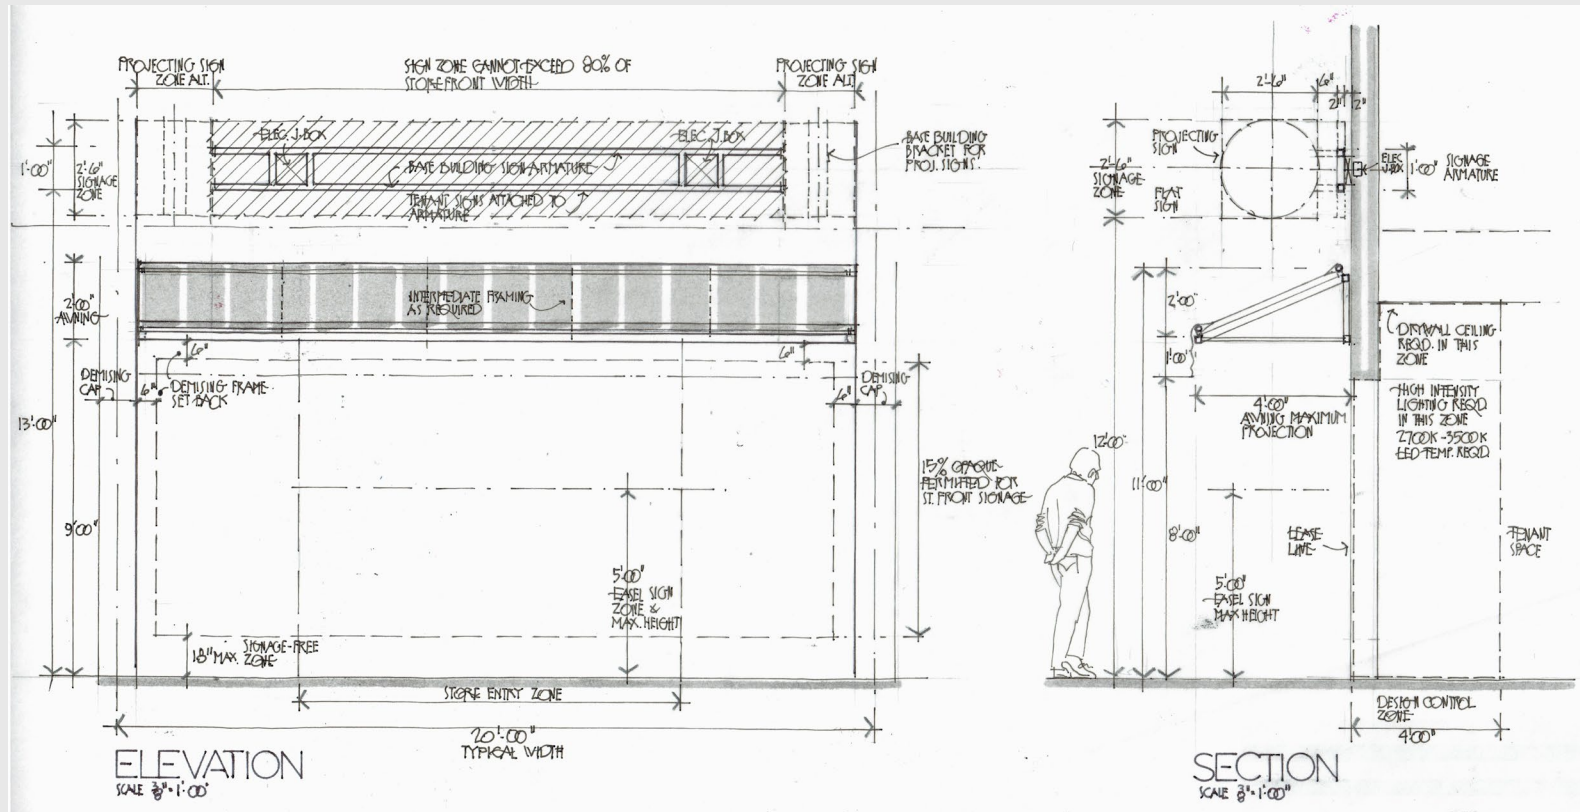

Concept options for canopies and signage

CrosbyJenkins. Baltimore, MD

Concept for new façade treatment of an existing Falls Road building for a CrosbyJenkins – a premier interior design firm.

The concept creates a cohesive roof-line and provides identifiable retail store frontages with an aesthetic that is complementary to other neighborhood retail frontages.

Storefront Design Guide

Downtown Partnership of Baltimore

The Downtown Partnership of Baltimore works with government agencies, developers, property managers, architects and neighborhood groups, and residents to bring the best urban design and planning practices to the Downtown core.

The Storefront Design Guide provides ideas and criteria to assist Baltimore businesses renovate properties in a way that can contribute positively to downtown revitalization and community vibrancy.

The Design Guide illustrates preferred approaches for storefronts, signage, lighting, and canopies, including visual examples and sketches

Existing Water Street

Storefront Design Guide Downtown Partnership of Baltimore

As part of the Design Guide, Swanson Design was asked to develop a vision for one of downtown Baltimore's unique corners and alleyways - Water Street.

The sketch rendering on the left of this page shows the potential transformation and revitalization of the Water Street enclave with outdoor cafes, restaurants enlivened with colorful banners, flags and signage.

Typical Seating Area

Concept Sketch - Bar Area

Xenia Restaurant - Columbia MD

Xenia is an elegant, contemporary Greek restaurant, which transports diners to the Mediterranean with its blue and white color palette and elegant ambience.

The feature counter at the open kitchen displays a selection of fresh seafood, giving this sophisticated space a feeling of authenticity. Back-lit glass sculptures by internationally acclaimed Nikolas Weinstein, protrude from the layered soffit. They provide focal points above the main dining area and bar, evoking the idea of billowing sailboats on the Mediterranean's Ionian Sea.

Plush banquette seating interspersed with mahogany single tables, offer seating for intimate and group dining.

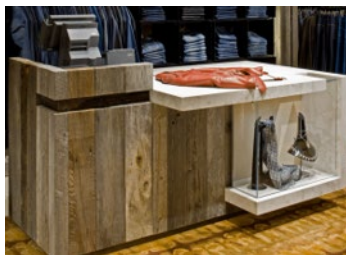

Soft cove lighting enhances the dining experience.
